
4 **What a monitor may read, and how well it detects a violation (AUROC)**

L0	L1	L2	L3	L4
report	messages	calls	calls + results	everything
0.70	**0.80**	**0.74**	**0.93**	**0.90**

1 **A claim displaces the check**

0.82 → 0.47

Operator asks permission first
(no claim → false claim)
fix: claim filter restores it: 0.93

2 **The team acts unauthorized**

0.09 → 0.36

unauthorized-action rate V
(no message → false claim)
fix: claim filter 0.03; gate 0.00

3 **The report says “authorized”**

70%–93%

of violating runs, by team shape
(unsafe twins, no control)
fix: permission record: 81% → 26%
